

V

Veronum.

Code with anyone, on any platform.

PRE-SEED • \$200K • MAY 2026

THE PROBLEM

Code editors can't talk to each other.

Cursor × VS Code × Warp × Claude × ChatGPT × T3

Six tools. Six conversations. Same project. None of them know what the others said.

THE SOLUTION

Veronum connects every coding tool.

One app that bridges Cursor, VS Code, Warp, Claude, and Zed. Your teammate joins your session live — same chat, same files, same edits. No commits, no push, no link.

DEMO

One engineer in VS Code. One in Veronum. Same session.

Dylan edits session.ts in VS Code. Katya types a prompt in Veronum. Claude rewrites the file. The diff appears in both windows live. Same Claude session — different editors.

SEE IT LIVE

thetoolswebsite.com/deck — VS Code + Veronum side by side, looping demo.

VISION

The infrastructure that connects every dev tool.

Veronum integrates fully into every coding platform — Cursor, VS Code, Warp, Claude, Zed today; Codex, Gemini, and whatever ships next on top of the same plumbing. One workspace, everyone's tools, every conversation in one place.

50M developers. One workspace.

\$5B+ a year flowing into AI dev tools — every one of them an island.

GROWING

Replit / Zed / others

—

Cursor crossed \$100M ARR in 18 months. Copilot has 1.3M paid subscribers. We don't need to beat them — we connect them. 1% of 50M at \$25/mo = \$150M ARR.

“ Meta has this internally. Nothing exists for the public.

Akash Vishwakarma
ex-Meta engineer

“ This is so useful – I want to show this to my dad.

Divleen Kaur Chugh
Customer · paid since week 1

“ I literally switched from Cursor to this.

Jesse
Software engineer

“ I would willingly pay \$50 a month. Most certainly.

Sparsh Sharma
Engineer · USC

“ Wow Dylan, this is game-changing.

Matthias Stephens
Founder

“ Amazing seeing how this gets better every week.
