PRE-SEED • \$200K AT \$5M POST • APRIL 2026

OUR BET

Foundation model AI is becoming a *commodity*.

The workspace layer above it — version history, multi-agent orchestration, native data integrations — is where users stay, where switch costs build, and where willingness-to-pay is.

THE PROBLEM, IN OUR CUSTOMER'S WORDS

" This is so useful — I want to show this to my dad, he'll love this.

Divleen Kaur Chugh

Veronum customer · paid since week 1

Real usefulness travels by word of mouth. Divleen has been paying since week one.

Claude with everything you wish it had.

One Mac app. Seven days free. \$25/month.

- ✓ Multi-agent composer (1–10 parallel)
- ✓ Version history with one-click revert
- ✓ Live meeting transcripts via Whisper
- ✓ Stripe / Supabase / Slack connectors
- ✓ Every Claude feature you already pay for
- ✓ Local-first — your data stays on your Mac

One prompt. Ten agents in parallel.

The actual Veronum desktop UI — claude.ai chat shell with our dwc-* injections. Click the @agents pill, dispatch a master task to a parallel fleet of 1–10 agents, watch them complete in parallel, ship.

- 1 **Click @agents pill** Bottom of composer · opens a popover above
- 2 **Master task + 1–10 agent rows** One headline goal, up to 10 parallel sub-tasks
- 3 **Send → fan-out** Dispatched as @dwc-agent-1..N — Claude orchestrates in parallel
- 4 **Synthesis** One assistant message summarizing all agents' work, with PR / diffs

SEE IT LIVE

thetoolswebsite.com/deck — animated demo, scripted, loops every 18 seconds.

The window is open.

01

Foundation models are good enough.

Claude 4.6 isn't the bottleneck anymore. The value migrates to what surrounds the model — undo, multi-agent, meetings, data — and that's a workspace problem, not a model problem.

02

Power users are already paying us.

\$125 MRR in two months, every customer inbound, zero paid marketing. They aren't waiting for Anthropic to ship desktop integrations — they're voting with their cards.

03

The lane is empty for 18 months.

Cursor went vertical on code. Granola on meetings. Raycast on launchers. Anthropic optimizes for API + safety, not desktop UX. Nobody is bundling the workspace on top of Claude — yet.

The first 6 users found us themselves.

" Wow Dylan, this is game-changing.

Matthias Stephens
Founder

" I literally switched from Cursor to this.

Jesse
Software engineer

" I would willingly pay \$50 a month for this. Most certainly.

Sparsh Sharma
Engineer · USC

" It's amazing seeing how this gets better every week.

UNSOLICITED TESTIMONIALS

From the 6 paying users

Acquisition entirely from inbound — DMs, friends-of-friends, no paid marketing yet. Conversion to paid happens within 24 hours of download.

BUSINESS MODEL

\$25 / month flat.

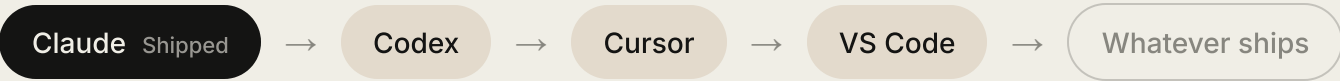

Stripe-billed. 7-day trial. ~85% gross margin after Anthropic API + Stripe fees.

EXPANSION PATH

NOW	Solo	\$25 / mo	Today. Mac desktop + soon-to-launch web app.
NEXT	Teams	\$75 / seat	Q3 2026. Shared agents, shared connectors, billing on one card.
NEXT	Enterprise	negotiated	Q4 2026. SSO, audit logs, BYO Claude API key, on-prem MCP.

Claude is the start. The workspace is the prize.

Today we're the better Claude. Next we're the layer above every AI tool you use — one identity, one agent runtime, one bill, cross-tool memory. Eventually we're the platform every AI agent ships into.

TODAY	Veronum on Claude	\$25/mo · 6 paying users · \$125 MRR growing weekly
NEXT	Veronum on every model	Codex, Cursor, VS Code, Gemini — same workspace, every tool. We become the layer above the API wars.
BEYOND	The OS for AI work	Cross-tool memory · agent marketplace · one identity · one bill — the workspace where AI work lives.

Your favorite product. Your account. Better output.

MARKET

A real audience that already pays.

Sources: Anthropic disclosed 100M+ Claude users in their 2025 investor materials; we estimate ~8% are on paid plans. Mac power user share extrapolated from Claude Code adoption data.

The only one bundling all four.

FEATURE	claude.ai The foundation	Cursor Code-only IDE	Raycast Utility launcher	Granola Meeting-only	Veronum Workspace on Claude
Multi-agent composer	—	~	—	—	✓
Meeting transcripts	—	—	—	✓	✓
Data integrations	~	—	~	—	✓
Version history / undo	—	✓	—	—	✓
Sits on top of Claude	✓	—	—	—	✓

Workspace + agents + meetings + data — on top of the Claude you already pay for. That row of green checkmarks is the moat.

Dylan Wain

Founder · 2× founder

Built a marketplace from zero to B2B contracts before AI was obvious.

PRIOR

Dibby Tour

Gig-economy on-demand inspections marketplace. Hired ex-Uber city managers + retired Airbnb city managers as operators. Closed UCLA and USC as B2B partners — two universities, two contracts, real revenue.

NOW

Veronum

Idea to paying customers in two months. Engineering, design, and customer development end-to-end.

\$200K = 12 months of acceleration toward PMF.

90% ENGINEERING + PRODUCT

Veronum desktop polish · web app at thetoolswebsite.com/app · expand beyond Claude (Codex, Cursor, VS Code)

10% INFRASTRUCTURE

Anthropic API at scale · Vercel · DB · observability

Every dollar buys product. Marketing comes after PMF.

THE ASK

\$200K

at \$5M post-money. \$35K already committed.

12-MONTH MILESTONES

- \$50K MRR
- Web app launched at thetoolswebsite.com/app
